PROFESSIONAL SUMMARY

Machine Learning Engineer and full-stack developer who turns research-grade ML into shipped products. Builds end-to-end pipelines and data-driven applications with Django, React, and modern NLP/LLM tooling from patent-analytics platforms to offline retrieval systems. Driven by hackathons, applied research, and solving hard problems with AI.

EXPERIENCE

Machine Learning Engineering Intern | *FlyRank AI (Remote)*

- Jul 2026 – Aug 2026
- Built and evaluated content-refresh scoring models on a large anonymized dataset to prioritize SEO content updates - Worked with FlyRank's ML team on model evaluation, iteration, and reporting for a live scoring pipeline.

TECHNICAL SKILLS

- **Programming Languages:** Python, C, JavaScript
- **Machine Learning & Data Science:** Scikit-learn, PyTorch,Pandas, NumPy, Data Analysis, EDA, Feature Engineering, Data Visualization
- **Mathematics:** Statistics, Probability, Linear Algebra
- **Web Development:** Django, Django REST Framework, React.js, REST API Design
- **Databases :** MySQL, MongoDB, SQLite
- **Tools:** Git, GitHub, AWS,Docker,VS Code, Jupyter Notebook, Oracle Cloud Infrastructure (OCI)

PROJECTS

TechSentry / *Django · React · LLMs · Patent APIs* *Apr 2026 - present*

- Built a full-stack technology intelligence platform (Django REST, React, SQLite) for research trend discovery and forecasting, designed for DRDO.
- Developed AI pipelines using topic modeling, clustering, and Hugging Face LLMs to surface research hotspots and estimate Technology Readiness Levels (TRL).
- Integrated OpenAlex, CrossRef, and patent metadata with semantic embeddings to power interactive visualizations and alerts.

OmniRecall | Python · LangChain · ChromaDB · Ollama June 2026

- Built an open-source, privacy-first desktop app that captures screenshots, performs OCR, and indexes text into a local vector database for semantic search.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline using LangChain and Ollama to answer natural-language queries over past screen activity.
- Designed a fully offline architecture (ChromaDB + local LLM) with zero cloud dependency for complete data privacy.

HACKATHONS & COMPETITIONS

AXION Intra-College Hackathon — 3rd Place *March 20, 2026*

Team Gradient Descent | Saraswati College of Engineering, Kharghar

• Secured 3rd rank in an 8-hour intra-college hackathon; developed and presented a full-stack solution under competitive time constraints.

CodeCrafters 3.0 Inter-College Hackathon — Participant *March 28–29, 2026*

Team VajraCore | Coding Club, SCOE Navi Mumbai

• Built and pitched a full-stack project in a 24-hour inter-college hackathon environment as part of Team VajraCore.

Winner – Idea of Impact: Innovation Challenge, Saraswati College of Engineering

EDUCATION

Bachelor of Engineering (BE) – Information Technology *2024 – 2028*

Saraswati College of Engineering, Kharghar | University of Mumbai

• CGPA: 9.31 (First Year) · 9.675 (Second year)
• Relevant Coursework: Data Structures & Algorithms, DBMS, Machine Learning, Applied Mathematics, Web Development

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate – Oracle (Oct 2025)
- Winner – Idea of Impact: Innovation Challenge, Saraswati College of Engineering
- 3rd Place – AXION Intra-College Hackathon, Team Gradient Descent, SCOE Kharghar (March 2026)
